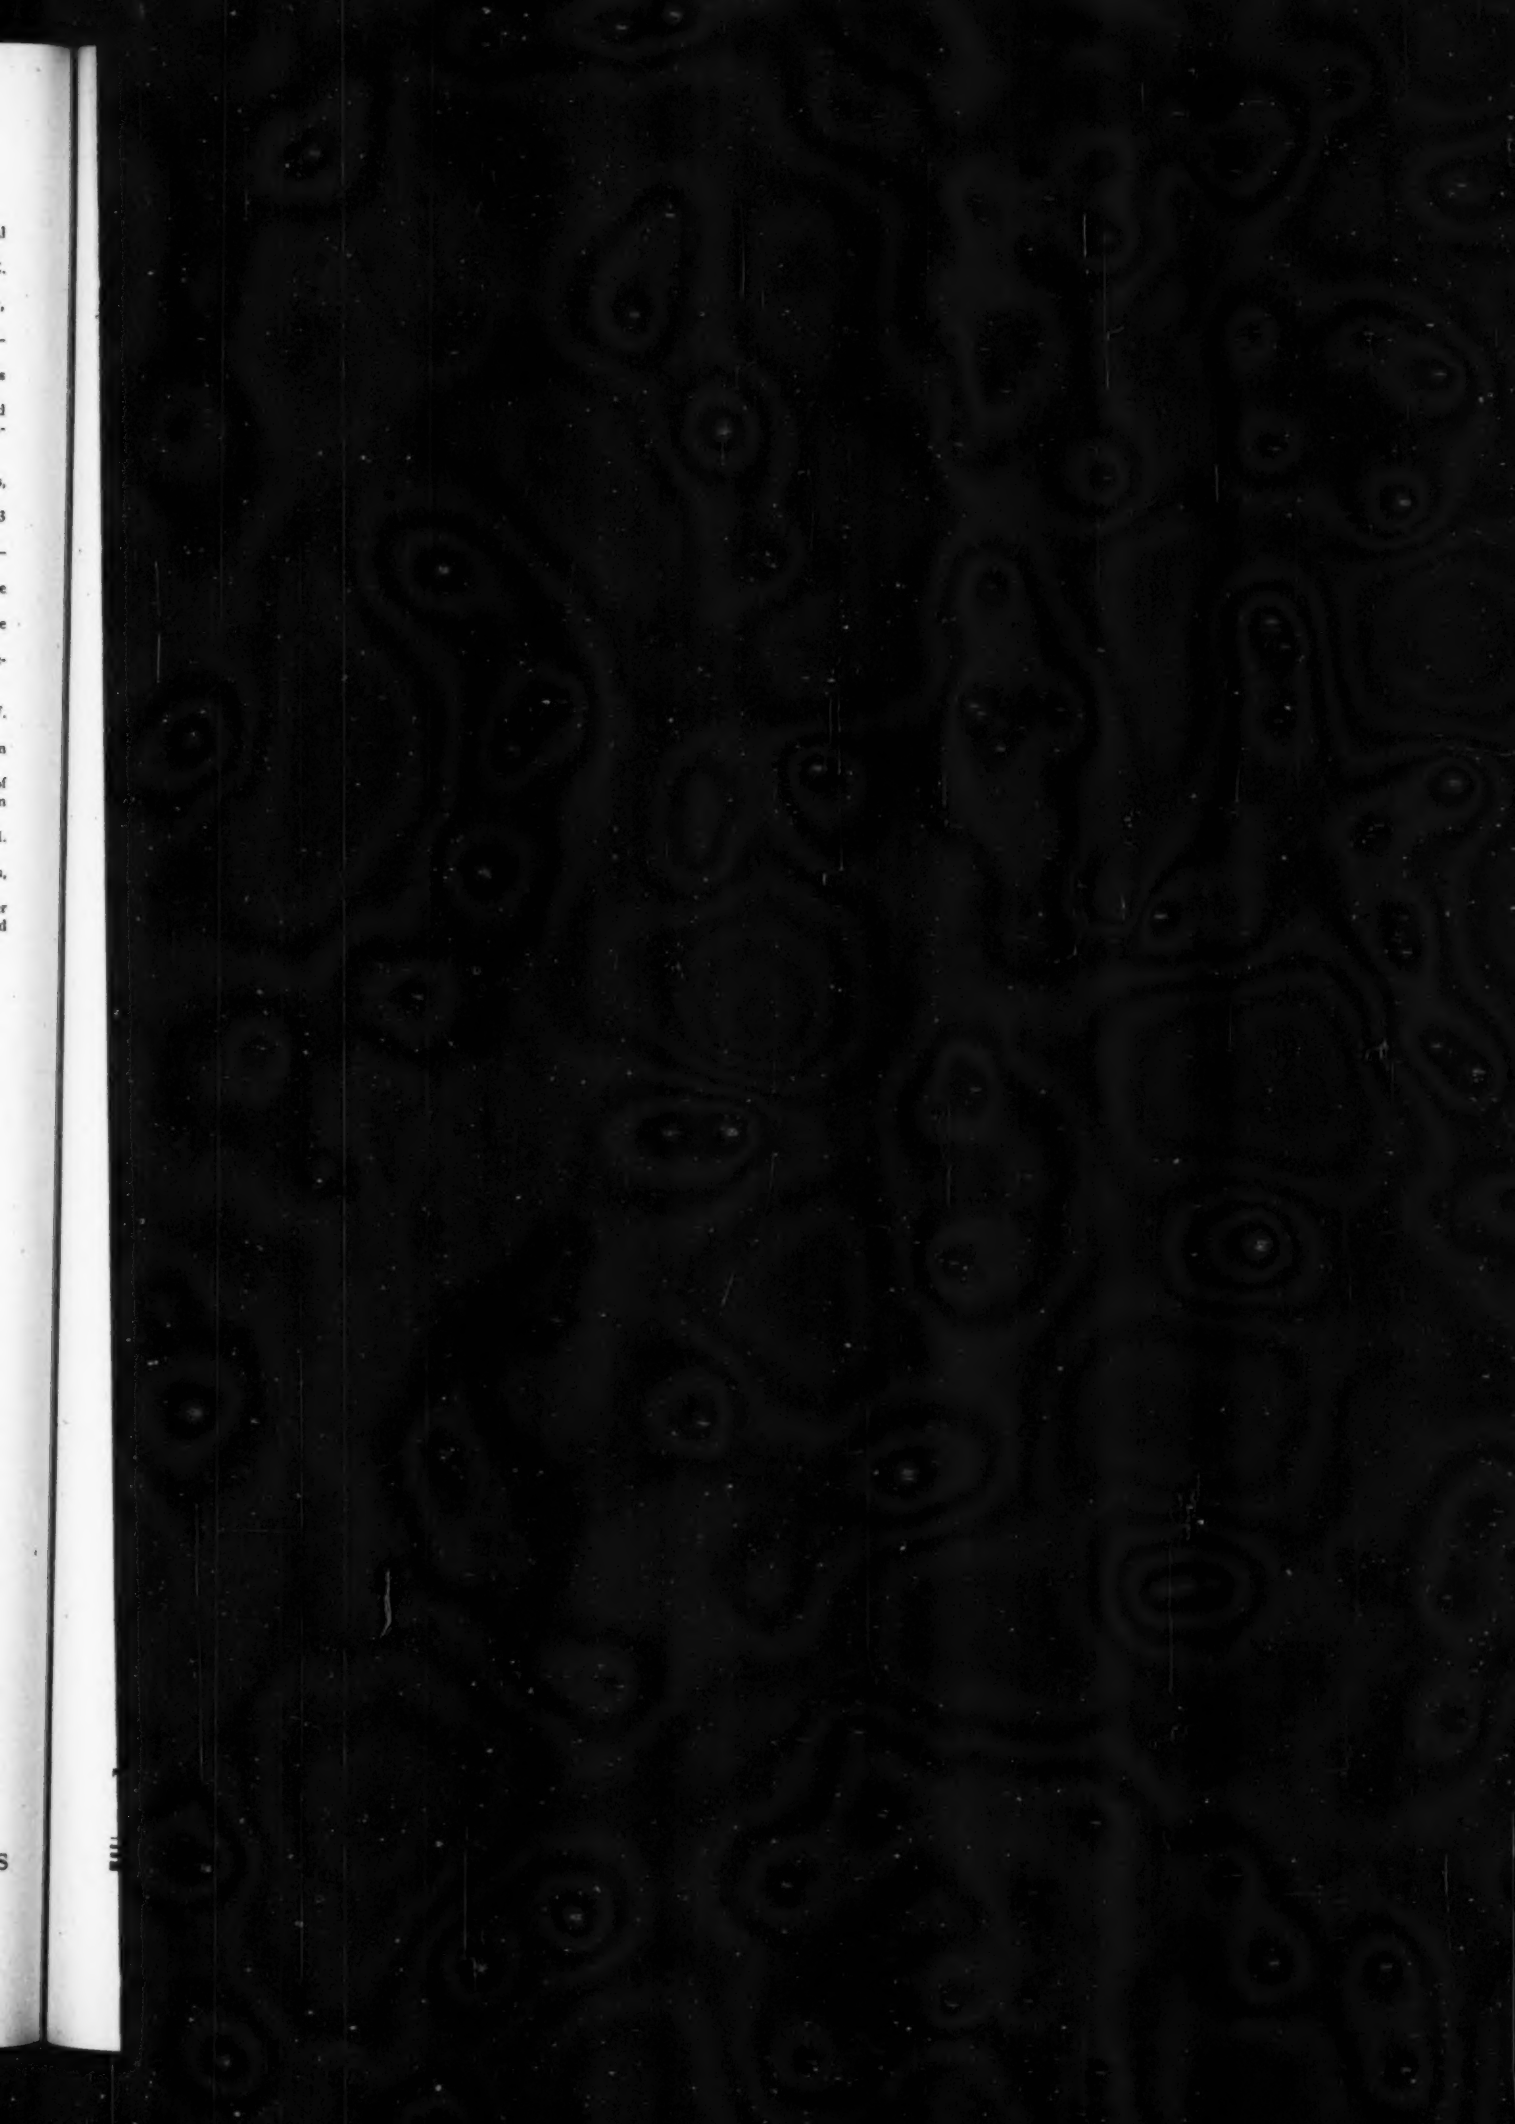
Torsional vibration of multi-disk systems, E. Fisher—676
Total and free energies of formation of the oxides of thirty-two metals, M. de K. Thompson—581 (review)
Transition, Thermal expansion and second-order transition effects in high polymers, R. F. Boyer and R. S. Spencer—398
Transmission-line theory and its application, R. King—292 (erratum)
Transmission line theory applied to wave guides and cavity resonators. I, D. Middleton and R. King—524
Transmission line theory applied to wave guides and cavity resonators. II, D. Middleton—535
Tube, Magnetically focused radial beam vacuum, A. M. Skellett—704
Twinning in zinc oxide, M. L. Fuller—164
Twist, Extension of the conventional twist multiple formula to new materials, S. L. Gerhard—474
Two-dimensional problems of elasticity, General solution of, L. Beskin—562

U. S., Mobilization of scientific resources—IV, The U. S. Navy, E. Hutchisson—203
U. S. Naval research Laboratory, A. H. Van Keuren—221
U. S. Navy Radio and Sound Laboratory, P. H. Hammond—240
U. S., Organization of the U. S. Navy, E. Hutchisson—205
U. S., Research and experimental activities of the U. S. Naval Proving Ground, D. I. Hedrick—262

Vector, Simple vector method for the determination of orientation of cubic single crystals from back reflection x-ray photographs, B. F. Decker—610
Velocity, Electromagnetic velometry. I. A method for the determination of fluid velocity distribution in space and time, A. Kolin—150
Velometry, Electromagnetic velometry. I. A method for the determination of fluid velocity distribution in space and time, A. Kolin—150
Vibrating bodies, Numerical method in the theory of, A. Vazsonyi—598
Vibration of a hinged beam, General, H. K. Brown—410
Vibration, Resolution of boundary value problems by means of the finite Fourier transformation: General vibration of a string, H. K. Brown—292 (erratum)
Vibration, Torsional vibration of multi-disk systems, E. Fisher—676
Vibrations by use of materials of high damping capacity, Problem of reduction of, A. Gemant—33
Viscosity of water, J. R. Coe, Jr., and T. B. Godfrey—625 (L)
Vulcanizate of natural rubber, Stress-temperature relations in a pure-gum, L. A. Wood and F. L. Roth—781
Vulcanizate, Some relations between stress, strain, and temperature in a pure-gum vulcanizate of GR-S synthetic rubber, F. L. Roth and L. A. Wood—749

War and industry, Basic mathematics for, P. H. Daus, J. M. Gleason, and W. M. Whyburn—519 (review)
Water in capillary tubes, Rate of rise of, G. Pickett—623 (L)
Water, Viscosity of, J. J. Coe, Jr., and T. B. Godfrey—625 (L)
Wave guides and cavity resonators. I, Transmission line theory applied to, D. Middleton and R. King—524
Wave guides and cavity resonators. II, Transmission line theory applied to, D. Middleton—535
Weather, Astronomy, maps, and, C. C. Wylie—581 (review)

X-ray measurement of order in the alloy Cu_3Au, Z. W. Wilchinsky—806
X-ray micrographs, Microradiographs and, E. L. Garvin—455 (L)
X-ray, Simple vector method for the determination of orientation of cubic single crystals from back reflection x-ray photographs, B. F. Decker—610
X-ray studies of chain polymers, I. Fankuchen and H. Mark—364
X-ray study of the copper-manganese binary alloy system, L. D. Ellsworth and F. C. Blake—507
X-ray structure of rubber and the size and shape of rubber crystallites, Observations on the, S. D. Gehman and J. E. Field—371


Zinc oxide, Twinning in, M. L. Fuller—164
